British Association of Paediatric Surgeons Congenital Anomalies Surveillance System

The national system to study the surgical management of a range of neonatal conditions – enabling national audit in neonatal surgery

## NETS<sup>2HD</sup> Study: Six-year outcomes in children with Hirschsprung's Disease

We are pleased to announce that following a successful investigators meeting at the BAPS congress, the NETS<sup>2HD</sup> study has started in England and Scotland. We are running training sessions at multiple sites around the country, and if you would like us to visit your hospital or arrange a training session for your team, please contact Ben Allin on Benjamin.allin@npeu.ox.ac.uk or 07854009834. If you are interested in getting involved in the study, but haven't already done so, please let us know. We are aiming to have all sites up and running by the end of August 2017.

More information can be found at

## Outstanding data collection forms for Duodenal Atresia and Anorectal Malformation studies

There are still a number of outstanding data collection forms for both the Duodenal Atresia and Anorectal Malformation studies and study leads are in the process of contacting reporters with outstanding data collection forms. If you have any outstanding forms please return them as soon as possible. If you require replacement forms please contact the BAPS-CASS office at [baps-cass@npeu.ox.ac.uk](mailto:baps-cass@npeu.ox.ac.uk).

Abstracts Presented at BAPS Congress 2017 are now available online:
